## What Is Belbien?

Belbien is a medication commonly prescribed for the **short-term treatment of insomnia**. It contains **zolpidem tartrate**, a sedative-hypnotic compound that helps calm brain activity and makes it easier for individuals to fall asleep.

Doctors usually recommend Belbien for people who:

Belbien works by influencing certain chemical signals in the brain that regulate sleep. When taken as directed, it can help improve sleep quality and allow individuals to wake up feeling more refreshed.
